

Hollie Guard

Hollie Guard turns your smartphone into a personal safety device.

In danger? Simply shake your phone or tap the screen to generate an alert. Your location and audio/video evidence will automatically be sent to your emergency contacts who can act to help you quickly. A second shake sends out a high-pitched alarm and the flash starts to strobe to attract maximum attention.

Three Alarm Settings

Personal – Generic alarm can be customised, a second shake will provide a flashing light and high-pitched beep to draw attention

Stealth – Secretly and silently raises an alarm, perfect for high risk situations

Deterrent – Obvious alarm that makes it clear to others an alarm has been raised and your location is being tracked. A second shake will produce a flashing light and high-pitched beep.

Three alert types allow you to choose an alert setting appropriate to your specific needs.

Emergency Contacts

- You can create a variety of groups of emergency contacts including family, friends and co-workers
- You can choose which groups receive alerts, by turning specific groups on or off
- Creating different groups allows the flexibility and options for how they respond to various situations
- You can choose to have multiple groups receive alerts at any given point.

Meetings Feature

Meeting someone? The Meeting Timer gives you extra protection when you are going to a dangerous meeting or are meeting someone new. Simply enter descriptive information and the duration of the meeting. When the meeting time has expired an alert will automatically be raised. Ideal for lone workers.

Journey Feature

Traveling? The Journey feature allows you to notify your friends, family, and co-workers of your movements while traveling. Enter your start and end point, and an SMS & email will be sent to your emergency contacts when you've started and safely completed your journey.

hope, passion & a life fulfilled

Hollie Guard is ideal for all, including:

Children and teens

- Keep in contact with your children while they're travelling to and from school
- Teens can get help quickly while out with friends
- Parents and guardians are automatically contacted by SMS and email when the alert is raised.

Stalking and Domestic Violence victims

- Stealth alarm discreetly raises an alert with Hollie Guard
- Soft alert (Android only) allows you to get help simply by pressing the volume key on your device.

Athletes

- Man down will detect when you've fallen or stopped
- Journey keeps you safe while moving between points.

Turning your smartphone into your own free personal safety device, Hollie Guard can help you stay safe, be safe and feel safe and works on most smartphones (2010 onwards) Apple, Android, Windows.

This next generation smartphone personal safety app provides enhanced levels of protection and has gained the official certificate of the NPCC, Secured by Design. You can find out more about Hollie Guard and register for an account at www.hollieguard.com

@Hollie_Guard

A dedicated twitter account provides advice, updates and tips about how to get the most out of Hollie Guard.

Hollie Guard was developed by the Hollie Gazzard Trust (HGT) to help people stay safe. HGT was created to help young people to seek a better future and reach their potential through dedicated programmes designed to highlight, raise awareness of, and tackle domestic abuse, coercive control and stalking, and to support talented young hairdressers and beauticians. For more information about the Trust please visit our website www.holliegazzard.org The app was created in honour of Hollie.
